

Restore The Livability Of Your Home, Today!

Indoor air is four to five times more polluted than outdoor air. In homes built with corrosive drywall, additional hazardous chemical pollutants - reactive sulfur compounds and other corrosive and volatile organic compounds (VOCs) - are present in circulating air you breath and on surfaces.

The OdorKlenz® Process begins to capture and neutralize CDW-associated corrosive gasses immediately, at their source ... improving the odor of your home within days.

OdorKlenz has been tested and proven effective against a broad range of indoor air pollutants, noxious CDW odor and corrosive gasses. OdorKlenz is equally effective against unpleasant odors of daily living such as tobacco smoke, cleaning products, pet, and cooking odors.

- Convenient and proven effective in CDW homes
- Works in your existing air system - no other equipment costs
- Safe and green – natural earth minerals, non-toxic, non-corrosive, benign byproducts
- Neutralizes indoor air pollutants - irreversibly captures and destroys corrosive gasses and hazardous chemical compounds
- Limits further corrosion of metals and reduces unpleasant and noxious odors
- Does not add other chemicals to indoor air to mask odor
- Equally effective against odors of daily living – tobacco smoke, pets, food, cooking odors, and more
- No need to move out or rush to a decision regarding the long-term remediation of your home

For further information or to schedule a demonstration of OdorKlenz contact us at:

It was difficult to stay in my house. Now, we are able to breathe again. This is an excellent product - it works every time. ” ”

Whether you're living with corrosive drywall now or your home is under remediation, the OdorKlenz Process is the scientifically and field proven, non-toxic choice for the rapid, convenient, and cost-effective restoration of indoor air quality. OdorKlenz addresses chemical pollutants in all phases of remediation of a CDW compromised home.

OdorKlenz Products

Air Cartridge

The OdorKlenz-Air Cartridge is specially designed to neutralize corrosive chemicals and capture odors.

The cartridge conveniently takes the place of the existing air filter, but does so much more.

Available in standard and custom sizes. Sold individually, in the OdorKlenz Starter Kit, and as a part of 6 month and 12 month programs.

Laundry Additive

Clothing, towels, bedding, and other washable fabric can harbor unwanted drywall odors.

The OdorKlenz Laundry Additive is used right along with your favorite detergent to neutralize the corrosive residuals, restoring your items.

Available individually in 40 load size. A 12 load size is included with every OdorKlenz Starter Kit.

Carpet Treatment

Applied to an area of approximately 250 square feet (about the size of a typical medium-sized living area), this absorbent material captures odors and chemicals off-gassing from carpets or rugs.

The product is easily vacuumed up for removal and disposal and does not stain or bleach carpet.

Sold individually and is included in the OdorKlenz Starter Kit.

Structural Surface

Once your remediation is in sight and the drywall is removed, the structural surface need to be decontaminated.

The OdorKlenz Structural Surface Treatment provides immediate chemical neutralization and leaves behind an active barrier to prevent reemission of corrosive drywall odors.

Sold in gallons or cases of 6. Each gallon treats 500 square feet of structural surface area.

OdorKlenz Starter Kit

The OdorKlenz Starter Kit includes 3 air cartridges, a 12 load size of laundry additive, and 1 carpet treatment. The kit will mitigate the airborne odors through a 10 day process and provide a stabilized environment for an additional 30 days.

Programs are available for 6 and 12 months of stabilization with cartridges shipping monthly.

(They) have allowed us to move back into our house! They removed most of the foul smell in a few days ” ”
